

Human's Major Threat:
GLOBAL WARMING

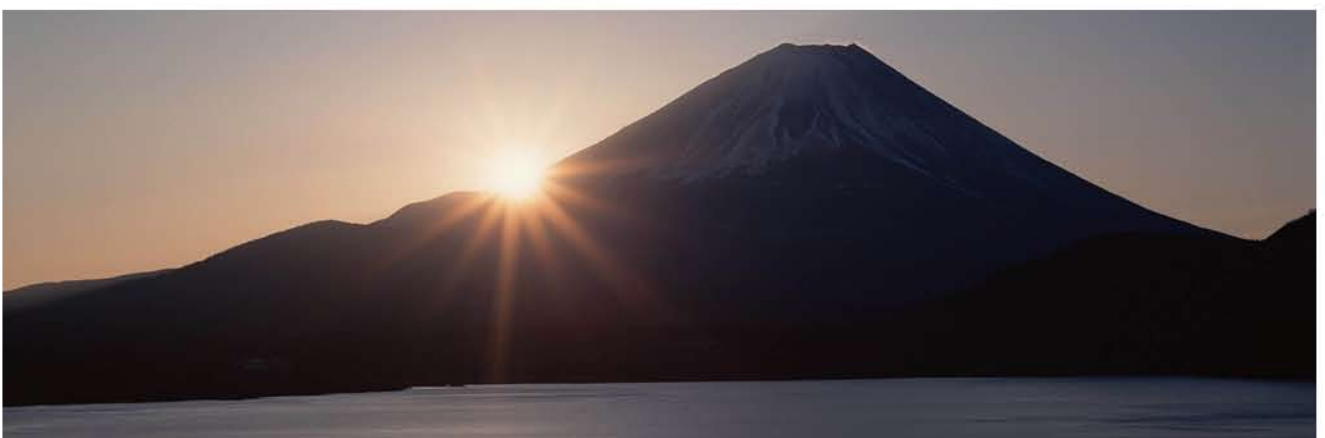

tell6.com

ORIGIN ORGANIZATION

A place
to stop
global warming

The horizon with blue sky high clouds, freshening air with beautiful sunlight, this is what we have always dreamt for.

Today, those dreams of living environments have gradually stepped away from us as with the increasing issues of global warming, our world has changed. Ice shelf at the North Pole started to melt which causes the sea level to rise, continually, and had resulted many catastrophic events to our world. Typhoons, floods, hurricanes are the examples of those effects and it has become worse than ever before, all these signal that our world is in danger, and the issue of global warming has become the priority for the human, we have to save the world.

What are the effects of global warming?

Animals losing their habitats

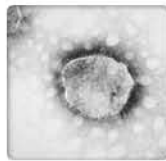

Animals losing their habitats due to global warming. Melting of ice shelves at the North and South Pole eliminates its contingent, which is the habitats for many wild life.

TORNADO

Infectious Diseases

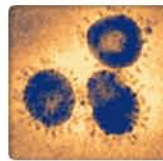

Infectious diseases are more common and are happening with deadly consequences. Hundreds of thousands of people were dead because of infectious disease every year.

Arena Virus

Tuberculosis

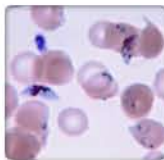

SARS

Nipah Virus

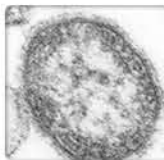

Ebola

Malaria

Lyme disease

Measles

Severe Acute Respiratory Syndrome (SARS)

Severe acute respiratory syndrome or SARS is a respiratory disease in humans has been one of the major fearful epidemic which had stroke the world from November 2002 to July 2003. This SARS epidemic appears to have originated in Guangdong Province, China in November 2002.

The SARS is caused by the SARS coronavirus and had caused 8,096 known cases of the disease.

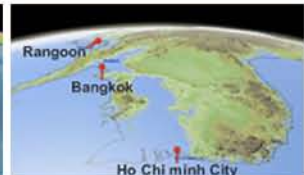

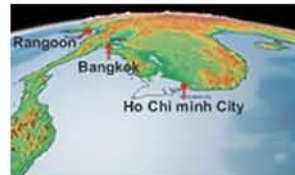

HURRICANE KATRINA

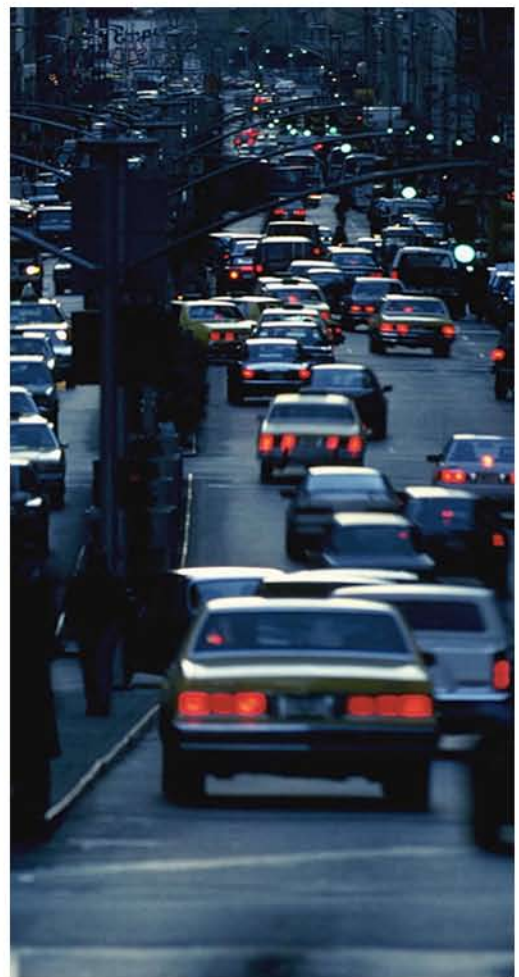

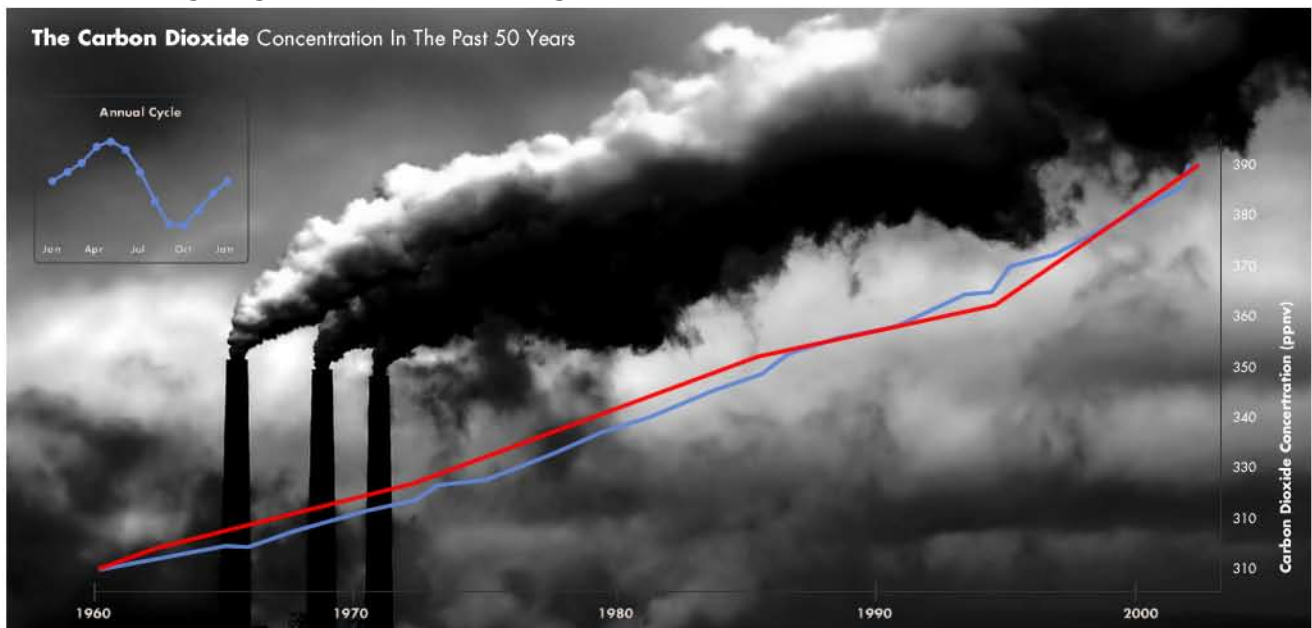

Water World

Scientists have predicted that if further global warming is continued, the West Antarctic ice sheet would have been completely melted and raise the global sea level by 20 feet. If the East Antarctic ice sheet is melted, the global sea level would have been risen by 200 feet, which many of the cities around the world would be in water world.

How do we save the world?
How are we going to take this challenge?

This issue is no more a slow responding government agencies of parties with limited resources can deal with, they are coming faster than they can handle. The only solution is to raise the awareness of the whole world, and let everyone on this planet know what is happening, and start with environmental friendly activities, utilize the power of influencing community to restore the sicken world back to its origin.

With this purpose, a non-profit organization, the Origin Organization Corporation has been incorporated dedicated to disseminate the information on global warming and how we can stop it to save our world. This corporation is setup from a team of people with strong sense of environmental oriented mind, through the help of the Internet and the concept of 6 degree together with the power of friends telling friends, to effectively convey our message to every possible person in the world in the fastest and widest manner, with the purpose to save our world from the global warming threat.

The world is warming

It begun hundreds years ago and had caused our living neighborhoods and environments changed dramatically, in an unpleasant way. Global warming has caused melting of the ice shelf at the North and Sole Pole, threatening and devastative natural catastrophic events such as floods, hurricanes, and tornadoes, and spreading of fearful and dangerous infectious diseases.

Deforestation and unrestricted fossil fuel burnings are the primary causes of global warming, and it is predicted that if global warming is continued in the next 100 years, most of the world cities will be in the water world, due to the melting of ice shelf at the North and South Pole that raises the sea level.

[About us](#) | [Contact us](#) | [Terms of service](#) | [Privacy Policy](#) | [FAQ](#) | Copyright © 2007 tell6.com. All rights reserved.

For the world future, our company will be implementing proven and more strategically effective methodology in the coming development phase, with the aim to attract more people to join our green “business”. In order to achieve our goal faster and effectively, we have specifically designed a reward system, whereby while members are delivering their efforts, they will be rewarded for doing so. This reward system is designed primarily for the reason to encourage every of the members to contribute their efforts to help stop global warming, and with this reward system, we anticipate massive participations of the people to contribute their efforts for our beautiful world.

“your voice will be heard by the whole world !”
Together we can make a difference.

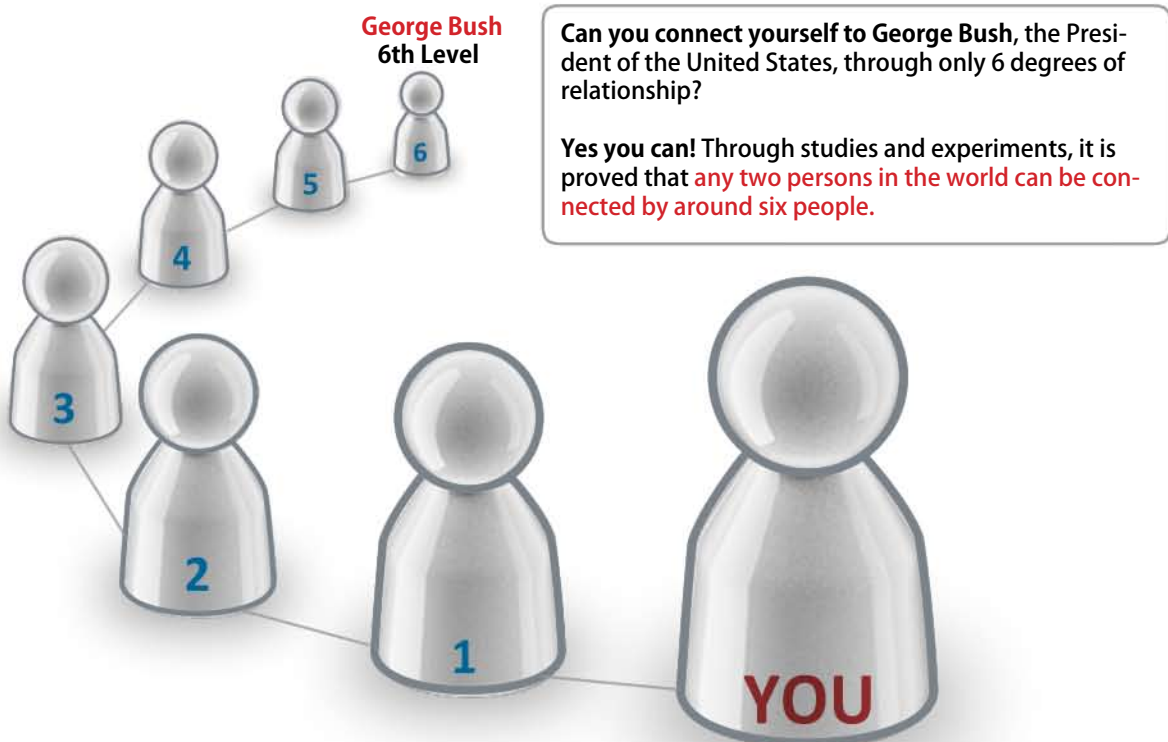

In tell6.com, we have several commission structures that members can benefit from, that are the direct referral commission, sixth level commission and the extended level commission.

To better inform the whole world, we have decided to apply the concept of 6 degrees into our commission structure. Six degrees defines that each person in the world can be connected with around 6 friend's of, and as of this, the sixth level referral commission is introduced.

Six degrees of separation

Six degrees of separation defines that given any two persons in the world, they can be related through at most six “friends of”. This concept was founded in 1995 and it has become part of the most welcomed notion being used around the world. It is also known as the Small World Phenomenon.

Direct Referral Commission

For direct referral commission, we will reward your effort of bringing new members to our community. When you tell a person about what our community is doing, you are eligible to receive your reward if the person chooses to participate in our community and become your direct referral.

Each direct referral will earn you \$25. If you bring in 6 referrals, you will earn \$150.

Network Structure Organization Rule

It is clearly stated in our terms of service that any attempt to arrange or organize your referral network structure is strictly prohibited and doing so will violate our terms of service and putting your account into the risks of being suspended or terminated. This term is to protect the existing community benefits and their hard work.

Examples of network structure organization that violate our terms of service including signing up multiple accounts with each being the referrer of another, forming a line of 6 levels referral network in an attempt to reap all the profits from your own 6 levels referral network, leaving virtually nothing for the person who introduced this program to you; or any attempt that will result in unfairness to your introducer, or referrer.

Example:

Sixth Level Referral Commission

Besides this direct referral commission, we have a sixth level referral commission that can earn you with millions of dollars. When your message reaches down to the sixth level, your efforts of doing so will be rewarded as every member on your sixth level will pay you up to \$60. If you refer 6 friends, and that 6 friends also refer 6 friends each, and it continues down to sixth level, you will have 46,656 members in your sixth level, each paying you up to \$60, which would up to \$2,799,360 or nearly 2.8 million of dollars. This commission is to reward you for being able reach the sixth level and hence achieving our target for the six degrees of separation: everyone is connected through six levels friend's of.

level 1
6 members

level 2
36 members

level 3
216 members

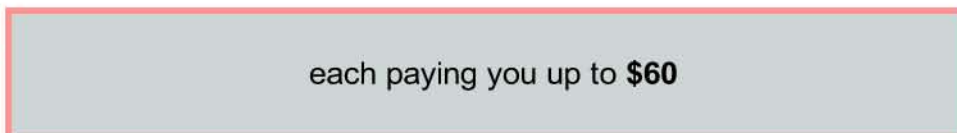

level 4
1,296 members

level 5
7,776 members

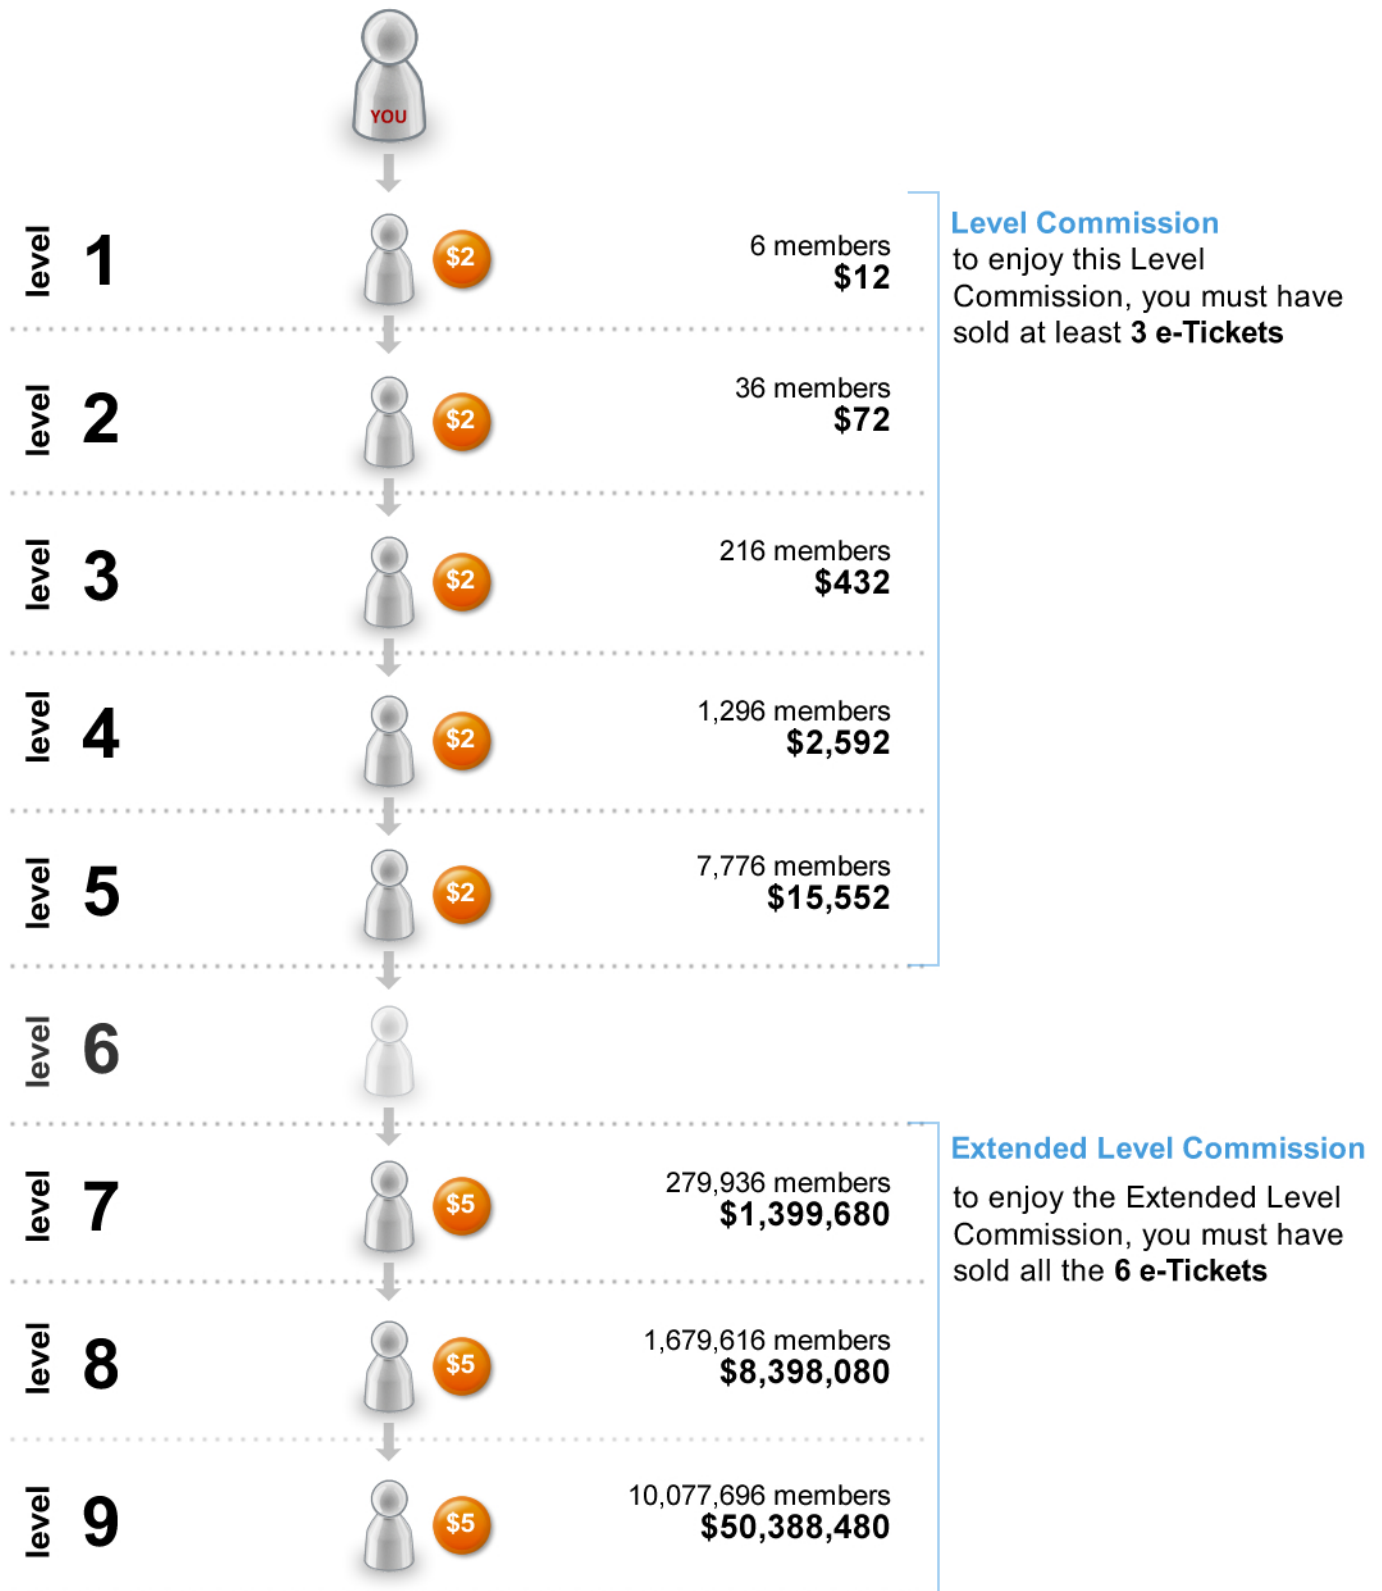

level 6
46,656 members

Total **Sixth Level Referral Commissions**: $46656 \times \$60 =$ **\$2,799,360**

Extended level Commission

Besides the sixth level referral Commission, there is an Extended level Commission that will entitle you up to 9 levels of commission and is separated into two parts. In the first part, you will receive \$2 from each of your referral network, from level 1 down to level 5, total 5 levels. The second part extends the commission level from level 7 until level 9, with each referral in that particular 7-9 levels contributing \$5 each to you. This commission again will pocket you over million in dollars.

All the reward commissions above pay in e-Cash. e-Cash is the monetary system in tell6.com which you can get it from your referral commission, or you can purchase it from our company or from the e-traders at our e-Trade Center.

e-Cash Reward Commission			
Commission Type	Volume	Total Commission (e\$)	
		Pending	Approved
Direct Referral Commission	6	0.00	150
Sixth Level Referral Commission	310	0.00	18600
Level Commission	856	0.00	1712
Extended Level Commission	453	0.00	2265
Total:		0.00	22727
